

KES IDT 2009
First KES International Symposium
on Intelligent Decision Technologies
Himeji, Japan
23-25 April, 2009

INVITED SESSION
INTELLIGENT DATA PROCESSING TECHNIQUES FOR DECISION MAKING

Advances in computer technologies have enabled the generation and storage of digital information in an easy way. The amount of digital data, either in the form of text, graphics/images, or audio/video, that we generate and process increases each day. Hence, the tasks to effectively and efficiently process and analyze voluminous digital data have become very important and challenging.

Papers are invited from prospective authors with interests in this particular special session and related areas of application. We solicit contributions on theoretical models and applications pertaining to intelligent data processing techniques for decision making in, but not limited to, the following areas,

- ❖ new and novel computational intelligence models and algorithms in data processing;
- ❖ applications of computational intelligence models and algorithms in data processing;
- ❖ other intelligent techniques and applications related data processing

Here, data processing encompasses handling and analyzing either text, graphics, images, audio, or video data in engineering, medical, scientific, financial applications, etc.

SUBMISSION OF PAPERS

To ensure high quality, all papers will be thoroughly peer-reviewed. Accepted papers will be published as a book chapter by Springer and indexed in ISI conference publications, EI, INSPEC, etc. All papers must be presented by one of the authors who must register for the conference. Details of the required paper format and submission procedure are available at <http://idt-09.kesinternational.org/>. Some key dates are as follows:

Submission of Papers: 15 November 2008
Notification of Acceptance: 15 December 2008
Upload of Final Papers: 10 January 2009
Early registration deadline: 12 January 2009

If you have any questions or queries, please contact the session chairs.
