INVITED SESSION

Decision Making in a Changing Financial and Social Environment

<http://idt-09.kesinternational.org/user/ISdisplay.php>

The KES has hosted world class conference for the past decade, which have grown so large that it is necessary to split the proceedings into smaller symposiums to enable refined collaboration between colleagues in concise fields of expertise. The international Symposium of Intelligent Decision Technologies is one of the five symposiums proposed during 2009.

Aim

Papers in this session are aimed at exploring discussions about decision making in a Changing Financial and Social Environments. All works in finance, data analysis, market models, prediction tools, software and case studies will be considered.

Topics

The expected topics include the following examples, but not limited to:

- *artificial market
- *agent modeling
- *financial times series
- *wealth distribution
- *Pareto distributions
- *critical phenomena
- *phase transition

Review Procedures

The conference review committee has agreed the use of a double blind process prior to accepting papers. To submit and tacking your paper(s), use the PROSE software (<http://idt-09.kerinternational.org/prose.php>). Papers are required in PDF format, accompanied with the source, either Latex or MS Word.

Important Deadlines

- *submission of Paper by 15 December 2008
- *Notification of Acceptance 25 December 2008
- *All Final papers uploaded NLT: 10 January 2009

Proceeding and Publishing Issues

Authors who submit and present their work will have the work published by Springer-Verlag.

A number of papers will be invited to contribute to a special issue of International Journal of Intelligent Decision Technology (<http://idt-journal.kesinternational.org/>) published by IOS Press (<http://iospress.nl/>).
